MOHAMED FAZAZI SENIOR DEVOPS ENGINEER

Casablanca, Maroc • +212696469531 • fazazi.moha@gmail.com • LinkedIn/mohamed-fazazi

PROFESSIONAL EXPERIENCE

SOCIETE GENERALE AFRICA TECHNOLOGIES & SERVICES - MOROCCO

DevOps and Cloud Engineer - August 2021 – Present

CI/CD Migration : Octopus Deploy → ArgoCD

- Led migration of CI/CD pipelines from **Octopus Deploy** to **GitOps** with **ArgoCD**, improving deployment speed and reliability.
- Automated **ArgoCD** and Kubernetes cluster setup/initialization to support **blue-green** deployments

TECHNICAL ENVIRONMENT: ArgoCD, Helm, Kubernetes, Git

Migration of Microservices from Azure Service Fabric to Azure Kubernetes Services (AKS)

- Led migration of 10 microservices handling 5M daily requests from **Service Fabric** to **AKS**.
- Automated **Docker** image builds (**Kaniko/Podman**) and deployment to **Harbor**; ensured image security with **Trivy** and retention policies.
- Standardized Kubernetes deployments using **Helm/Helmfile** and automated **CI/CD** with **Octopus Deploy** & **ArgoCD** across DEV/UAT/PROD.
- Managed secrets with **Azure Key Vault** & **HashiCorp** Vault; configured **Ingress**, **TLS**, **PV/PVC** storage, autoscaling (**HPA**, **KEDA**), and workload security via **Azure Workload Identity**.
- Monitored applications and clusters with **Azure Monitor**, **Prometheus**, **Grafana**, and **Container Insights**; optimized costs with spot node pools.

TECHNICAL ENVIRONMENT: AKS, VMSS, API Management, Key Vault, Service Fabric, Helm, Kustomize, Harbor, Ingress, KEDA, ArgoCD, Prometheus, Grafana, Trivy, Octopus Deploy, TeamCity, PowerShell, Python

Infrastructure as Code (IaC) with Terraform on Azure

- Developed reusable **Terraform** modules for Azure resources and environment-specific configurations.
- Automated deployments across DEV/INT/TEST/PROD via Octopus Deploy.

TECHNICAL ENVIRONMENT: Terraform, Octopus Deploy, TeamCity, PowerShell scripts.

Securing Azure Cloud Resources

- Enforced **Azure Policies** and reviewed configurations to strengthen security and restrict public access.
- Implemented **Managed Identity** for centralized, secure access to Azure resources.

TECHNICAL ENVIRONMENT: Azure AD, Managed Identity, NSG, Private Endpoints/Link, VNet, Azure Firewall, Key Vault, Azure Policies

Configuration Management with Ansible

- Automated installation and configuration of CI/CD tools ((Octopus Deploy and TeamCity) servers and agents using Ansible playbooks.

TECHNICAL ENVIRONMENT: Ansible, Windows/Linux Servers, PowerShell, Bash

TECHNICAL SKILLS

- **Infrastructure cloud** : Microsoft Azure, Qarnot Computing, Société Générale Private Cloud
- **DevOps tools** : Octopus Deploy, TeamCity, Jenkins, ArgoCD, Git, GitHub Enterprise
- **Monitoring** : Azure Application Insights, Elastic search, Kibana, Grafana, Prometheus, Container Insights
- **IaC & CM** : Terraform, Azure Resource Manager, Bicep, Ansible
- **Scripting** : Python, PowerShell, Shell/Bash

CERTIFICATIONS & EDUCATION

- Certified Kubernetes Security Specialist (CKS), 2026
- Microsoft Certified: Azure Developer Associate, 2025
- Certified Kubernetes Administrator (CKA), 2024
- Master's degree in Software Quality, Faculty of Sciences, Fez, Morocco, 2021
