AI Engineer
Data Scientist

Experienced Python Developer with 5+ years in Data Science, proficient in Python, TensorFlow, Tableau, AWS, and Machine Learning. Holds certifications in Data Science and Pandas. Dedicated to leveraging AI and analytics for data-driven insights and complex problem-solving

WORK EXPERIENCE

AI Engineer – Freelance – Full Time
TELUS Digital

August 2025 – March 2026 (8 months) Casablanca (Hybrid)

- **Mission** : Development and implementation of an Artificial Intelligence ecosystem for the digital transformation of call centers.
- **Tasks** :
- Needs assessment
- Communication with business stakeholders (Following up to meetings/planning)
- Establishment of the technical development roadmap
- Collaboration with AI engineers for the implementation of production tools
- Prompt engineering/Prompt modularization
- MCP server development
- Integration of Telus call center business tools
- Testing with GitHub Actions
- **Tools & Technologies** : Python, VSCode, Json, Toon, MCP SDK, Claud, Gemini, OpenAI, Git, Github, Jira, APIs, REST, Postman,
- **Working method** : Agile

Data Scientist / AI Engineer – Full Time
Alten Delivery Center Morocco – Client : Renault

February 2025 – July 2025 (6 months) Rabat – Sale (Hybrid)

- **Mission** : Development and Implementation of an AI System for Automotive Alerts Prediction.
- **Tasks** :
- Gather Data Samples
- Study Data time Granularity
- Define metrics for Solution Implementation
- Data Cleaning and Cleansing
- Modeling using different model Architectures (XGBoost, CNN-1D, RandomForestClassifier, LSTM, ANN, Logistic Regression, …)
- Setup Monitoring Dashboards
- Setup Alerts on Grafana
- Reporting and participating in meetings (Daily, Weekly, Sprint planning,…)
- Lead Junior team members
- Talents development
- Backup and Tech Lead
- **Tools & Technologies** : Python, Pandas, SQL, BigQuery, MongoDB, Databricks, Grafana, VScode, TensorFlow, GCP, Docker,CI-CD, Flask, Gitlab, APIs, Postman.
- **Working method** : Scrum

Data Scientist / AI Engineer – Full Time
Capgemini Technology Services Morocco – Client : Alcatel Lucent Enterprise

June 2021 – January 2025 (3 years 7 months) Casablanca (Hybrid)

- **Mission** : Development and Implementation of a Sales Chatbot of Telecommunication Materials in a Cloud Environment.
- **Tasks** :
- Improved Training Data Quality for NLP Model
- Building Internal Tools Using Jupyter to Fix Data Pipelines
- Implementing Unit-Tests (Coverage +85%)
- Building Pre-deployment Test Logic
- Implementation of RASA Test Stories to Ensure +80% of NLU is Working
- Regular Upgrades/Migrations of the RASA Framework and Corrections of Regressions
- Redesign of RASA Model Pipeline Architecture Using Pre-trained Models (Hugging Face, distilbert) to Ensure Better Intent Detection and Enhance NLU Performance
- Monitor Issues Evolution of the Solution Parts With AWS CloudWatch (LogInsights and Alarms)
- Help Implement GenAI features (Search through document) With LLMs (AWS Bedrock)

SKILLS

Languages : PYTHON SQL CUDA
CLOUD: AWS
Operating Systems : Linux WINDOWS 10
BI Tools : Power BI Tableau
Data Science : Data Visualization Data Preparation ML/DL Statistical Analysis Naive Bayes Decision-Tree Computer Vision CNNs TensorFlow Keras NumPy Pandas Matplotlib Seaborn Skimage PySpark Scikit-Learn cuDNN Pydicom OpenCV
Texte Editing : Word Excel Power Point
Versioning : Git

CERTIFICATIONS

- **TensorFlow for Deep Learning Bootcamp**
  Issued by : Udemy, **WIP [42%]**
- **Getting Started with Deep Learning**
  Issued by : Nvidia DLI, December 2023
- **The Data Science Course: Complete Data Science Bootcamp**
  Issued by : Udemy, October 2023
- **Exploratory Data Analysis With Python and Pandas**
  Issued by : Coursera, June 2023
- **Application Security Engineer - Mastery Award for Students 2017 – 2019**
  Issued by : IBM, 21 May 2019

ACHIEVEMENTS

hackerrank.com\Night_Baron

Side Projects

Computer-Hardware-Documents-RAG

Technologies : Flask, Pydantic, Streamlit, Langchain, tiktoken, pypdf, Loguru, ChromaDB, FastAPI

WORK EXPERIENCE

- Develop and Deploy user Back-end APIs
- Report and Follow up Issues on Gitlab (Milestones, Dashboard)
- Processing Users Data in AWS DynamoDB
- Reduce Training Time Using NVIDIA Accelerated AWS EC2 Instances by 530% (from 4h to only 45mins)
- Training and Fine-tune Models and Storage on AWS S3
- Fix Major Bugs and Document Processes to Increase Efficiency
- Improved The Solution For End Customers to Reach a Scale of +210% in Terms of Users Number (starting from 1500 to 3400 users)
- Engaging the Adaptive Cards as a Display Technology to Enhance The Solution's Ergonomy
- Containerize Solution Parts using Docker
- Spec, Documentation and Support.
- **Tools & Technologies** : Python, Pandas, SQL, Jupyter, PyCharm, RASA (AI), Chatette, AWS, Docker, Gitlab, CI/CD, Shell Scripting, APIs, Postman.
- **Working method** : Agile

Data Scientist - Internship

LIST Laboratory, Faculty of Sciences and Techniques

January 2020 – September 2020 (9 months) Tangier (Remote)

- **Mission** : Design and Development of an Intelligent System for the Detection of Intracranial Hemorrhage Using Transfer Learning.
- **Tasks** :
- Identifying Technological Needs
- Theoretical Study of Deep Learning Frameworks (Tensorflow, Keras) and CNNs Architectures
- CSV Data Cleaning (Removing Duplicates and Missing Values)
- Statistical Study of RSNA Medical Dataset (Dataset Targets Distribution, Dataset Targets Balance, …)
- Visualization Of Medical Data Images Characteristics (Raw Pixels, HU units, Pixels Spacing, Window Width & Level)
- **Dicom** Medical Images Preprocessing (Applying Different Transformations and Filters)
- Artificial Neural Network Modeling with 3 Pretrained CNNs (VGG16, ResNet50, InceptionResNetv2)
- Applying Transfer Learning with Fixed Feature Extraction Approach
- Monitor Training with Callbacks (Checkpoint, ReduceLROnPlateau, EarlyStopping)
- Tuning Using Kernel Initializers & Regularizers
- Scoring & Evaluation (Accuracy)
- Web Design & Deployment with Flask.
- **Tools & Technologies** : Jupiter, Python, TensorFlow, Keras, NumPy, Pandas, Matplotlib, Seaborn, Pydicom, Skimage, Imgaug, Scikit-Learn, Sublime Text, Flask, cuDNN, Spyder, JavaScript, Bootstrap, Postman.

EDUCATION

Faculty of Sciences and Techniques

Master's degree in Computer and Mobile Systems

September 2018 – September 2020 Tangier

Faculty of Sciences and Techniques

Bachelor's Degree in Computer Science

September 2017 – June 2018 Beni Mellal

Faculty of Sciences and Techniques

Associate degree option: Mathematics, Computer Science, Physics & Chemistry

September 2013 – February 2017 Beni Mellal

High School Ouaouizeght

Baccalaureate option Experimental Sciences (Physics & Chemistry)

June 2013 Ouaouizeght

LANGUAGES

- **English** : Professional Proficiency
- **French** : Professional Proficiency
- **Arabic** : Bilingual
- **Tamazight** : Native

SOFT SKILLS

Motivated | Curious | Autonomous | Organized | Critical Thinking | Empathy | Team Player

INTERESTS

Music | Writing | Voyage | Hiking | Photography | Video Games
